Thank you for the time that you have spent recently discussing the North Coast Regional Water Quality Control Board's concerns about the status of the investigation at the former Georgia Pacific Lumber Mill site located in Fort Bragg, California. I want to confirm that the Department of Toxic Substances Control (DTSC) will assume lead agency oversight for future site investigation and remedial activities. Your staff has been extremely cooperative and supportive in making the transition as smooth as possible. Their knowledge of this site will continue to be an invaluable source of information into the future.

Please contact me at (916) 323-3556, if you would like to discuss any aspect of the transition or DTSC's future activities.
